BILTMORE SERIES

FEATURES

Kiln-Dried All Wood Frame

Quality furniture starts with quality wood. Each Camden Cinema Seat features an all-wood frame, hand-assembled in the USA, for years of durability.

Leggett & Platt Wall Saver Reclining Mechanism

There's no need to place these seats in the middle of the room to relax in a fully-reclined position. Clever engineering means 5.5 inches is all the room that's needed between the seat and the wall behind it.

Premium Fabric Choices

Luxurious and durable, Camden Seating offers a microfiber suede or premium bonded leather, with a variety of color choices to suite any décor.

Premium Details

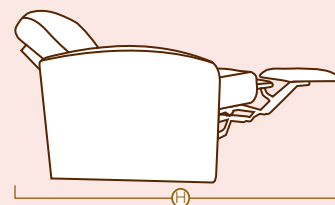

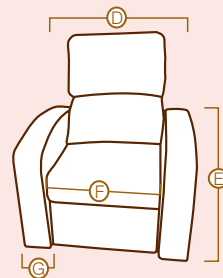

Camden Cinema Seats feature durable aluminum and steel release handles and cup holders, rather than plastic, made to last as long as the chair itself.

Powered Recline Option (Leather Only)

For the ultimate in comfort, this motorized option offers precision recline positioning that turns any chair into a custom-built throne for the perfect home theater experience.
