BWW Morehead KY	5/23/2018	2480	<p>We just had two other TVs start messing up as well. They're 55 one wont turn on at all and the other is fading from bottom up. One is: Serial#505A2731027 Model#LC-55LE653U the next: serial# BM506A1714432 Model# LC-55Le653U</p>								
BWW Morehead Ky	5/23/2018	2479	<p>Our 90inch in now mainly white washed on the image, no reset works Serial# 310814162 Model# LC-90LE657U</p>								

BWW Muncie	5/22/2018	2478		Again our surveillance videooutput is messed up. I tried replacing the monitor and the video cable but our surveillance video is still not working							
BWW Maysville RD	5/21/2018	2477		Our Satellite #4 is not receiving any HD channels. Was hoping that maybe someone could walk us through why its not picking thme up. Satellite #6 - We can not change the channel or pull up the guide on our touch screen remote. Satellite #6,7,8 - Will not display on either bar or dining room video walls. Says no signal - have tried to resetthe video wall from the remote and that does not help. Bar video wall - if the tvs get shut off after being on you can not turn them back on right away, the tvs display no signal. You have to shut them off for maybe 5 mns then turn back on and they will pop on with a tv channel. The dining room video wall does not currently do this.							
BWW Danville IL	5/21/2018	2476		Audio in the dining room goes in and out

Satellite 5 does not show anything but the direct tv signal and does not seem responsive to the Crestron.							
BWW Morehead	5/4/2018	2451		<p>The 5th rackmount transmitter is having an issue. The data button keeps blinking on it. I tried shutting it off and back on, nothing happened. I unplugged it for a little bit and nothing changed. I switched the hdmi cable from the back of the transmitter to the cable box it was connected to and nothing happened. I plugged in a working cable box hdmi cord into the transmitter port and nothing changed. When I plugged the working cable hdmi cord back to where it belonged it was fine. So I think its just something to do with that one part of the transmitter. I'll try whatever other suggestions you may have before you come to our store if need be.</p> <p>We still have 2 TV's completely down and 2 others that are fading. We have placed service requests for all of those already and it's been a few weeks. Thanks.</p>

BWW Glen Allen	1/23/2018	2306		I have TV that freeze on a picture. The only way to fix them is to pull the power to the blue boxes behind the TV's that are not working. The same picture freezes on multiple TVs when it happens so I think the issue is coming from the tower. It has happened mutiple on multiple inputs so I do not think it is the directv boxes. I spoke to Christopher tonight about the issue. I also spoke to Jared I believe on Saturday. I have put in a request previously and sent in pictures of the tower and boxes. I would like to get this addressed. It is causing issues with my customers.

New Albany LC Properties	12/11/2017	2226		I've called in on Sunday and left a voicemail for Ryan Welch on this issue and haven't heard anything back. At this timethe location can't change channels and sat box sources on the TVs ussing the Crestron panel. The panel went down over the weekend. We restored connectivity back to the panel but now no one is able to change the video source on any TV from the panel. Also the TV in the leasing office isn't appearing on the online panel that staff can access. TV 23 is the listed TV in the leasing office but TV 23 is also listed in the GOat bar so we will need to make sure that the correct TV is appearing. Please assist with getting this resolved as soon as possible.

Mt. Juliet Tn. Lc properties	11/6/2017	2157		Hello, at this time we are experiencing the following issues with all shared spaces between Leasing, Fitness, and Goat. Goat issues - music from pandora is constantly cutting in and out. Troubleshooting steps: we've chedk the rca jacks that plug into the processor and the physical cabling appears to be fine. TVs 5 and 20 are not working and won't respond to any commands made from the tablet. metadata not updating properly on crestron panel. Leasing/Fitness issues music is not ducking properly between fitness and leasing's pandora players							
BWW Morehead KY	11/6/2017	2156		We have a TV issue. Number 16 is fading out towards the bottom of the screen. This is about the 3rd or 4th sharp TV that's donw this. We called sharp like we always have to do and they said the TV isout of warranty. So we just need to know if it would be cheaper to fix this one or to buy a new one. Either method we must get approved through juice. I believe this is a 50 inch screen. The issue is ypically a backlight issues, I dont know if thats whats wrong here but thats typically the death sentence for a tv to get repaired thanks.							
BWW Short Pump/Glen Allen	11/3/2017	2155		The touc screen wall unit is not working. We are not able to change any of the channels on our DirecTV boxes, but we are able to change what the ouput source is for the TVs. The unit was reset earlier today which gave us back the ability to change the sound source and volume which is still working							
BWW Greencastle	11/3/2017	2154		We had our touch screen replaced on Wed this week and we do not have capability to turn on/off all TVs from the panel. We have over 50 TVs so having to go to each one and power them on/off can ve a chore and cause TVs to turn back on/off while changing other TV's. Im open to the idea of being walked through it over the phone if its not something majorly complicated. thank you, Josh Breedlove							

BWW SHELBYVILLE	11/2/2017	2153		We have a 70 in sharp tv that is flickering when its turned on. It flickers on the Sharp screen for a couple of minutes and then fully turns off. No other picture is show except the sharp logo

BWW Carmel	10/9/2017	2099		Our satellite receiver #2 has gone down. We have turned it off and turned it back on again, and it consistently turns itself off immediately. Was not sure if that is something we go through AVDI, or contact DirectTV.							

LC properties MT JULIET TN	10/9/2017	2098	<p>So a couple things. I did the reset that Paul forwarded to me. It resets all the software and kicked off the music for about an hour. After that all the boxes came to life except 5. (Box 5 has a flashing data light upstairs while every other blue box connected to the DirecTV box have solid data lights. This box is not connecting at all to the TVs. This is an issue I believe we can resolve on our end) I reset these boxes on Wednesday. By Friday, two boxes (3 and 6) had already frozen up. This requires us to go upstairs to manually change the games on the DirecTV box itself and have to call down. Setting up in the morning is fine, but when there is the midday swing on Saturday and especially Sunday with NFL ticket this is a HUGE inconvenience. We also had a couple different times where the box reset back to the channel it was on upstairs on the boxes that didn't work. I had two bartenders and a barback witness the tv change without anyone operating it. I don't know how that happened but it has happened now more than once.</p> <p>We have the boxes freezing up has been an issue since open. AVDI was doing a good job of resetting them in a timely manner. This last issue however, the ticket was opened up on</p>

BWW Waynesboro, VA	8/12/2017	1952	service call	<p>Not something that needs immediate attention but we recently had a remodel and had the new AV system put in. I did not think about this at the time but we typically have Live Trivia events every Wednesday and they used to use a microphone that worked through the old AV system so that the host could ask the questions for the Trivia night over our audio system. Out of curiosity, is there a way to use a microphone through our audio equipment currently and if not is there a way we can make this happen? Ryan Response: Hello Ryan, We have received your request. After looking through the input list I was sent from Chris the project manager who did the on site work for you, I do not believe that we put a microphone in the current system. It is a very easy fix though, if you would like this option there is an open input on the audio system for a microphone. We will be happy to aid in the installation, and we would be able to remote in and make the nesecary program changes to the audio system and control system so the microphone can be controled.</p>

BWW Glen Allen	5/30/2017	1834	Complete-Called-Ryan, Spoke to Abe. Directv box was reset at box and corrected issue.	I am having trouble with one of my direct tv boxes. It says error 771 and to check cables and satellites. I have trouble shot with dirrectv already. I have reset the box holding the red button on the front. I have unplugged it for 30 sec and plugged it back in. I have tried to reset the satellite in the options. I have disconnected the cable going into the box to discharge static electricity. I have checked all the cables that I have access to and they all seem secure. Dirrectv said I need a tech to come out and had noted that we used a 3rd party installer which I assume is you. They said to contact you because you were more familiar with the set up of our tower. Let me know if this is something that you can help me with. Thank you	Service, Phone call	Ryan

BWW-Ironton	5/24/2017	1824	coomplete-chris	We just received an upgrade from a very old system in our new store. A few days ago my t.v.'s turned on but read no signal Manager on Duty checked the inputs along with to make sure connection in the front of the tower was connected then called your office they decided to do a hard reset from your end. After the reset a day or two after I was in the process of changing the SAT boxes to games that needed to be on at that time. I discovered that SAT 5, 7, & 8 are stuck on one channel and wont let you access the menu nor will it let you change the channel. After discovering this issue I was approached and asked why a couple of the t.v.s wouldn't turn on or off. I grabbed the ladder to check connection behind the t.v. but found everything was connected. So I now have 5 t.v.s that will not turn on and SAT 5,7,& 8 are all stuck and will not let you change the channel. I appreciate any help you can give us. 5/24/17 Ryan responded: All 10 satellites are now showing feedback on the control system and should be controllable for you. Can you please provide more information regarding the TVs you are having issues with. Location, TV numbers, pictures of TVs and if the TV is stuck on or off.	Service Visit

Wings Etc.- Kendallville	5/7/2017	1811 same as 1813	complete-Ryan	Last week I started noticing that my alarm system would not let me set it off when I took off for the night. We usually would have to bypass zone 8 and then it would be fine. That's not the case anymore. We can't by pass it and we don't know what is causing it. Is there any way we can get someone out here to take a look at it? Last week I started noticing that my alarm system would not let me set it off when I took off for the night. We usually would have to bypass zone 8 and then it would be fine. That's not the case anymore. We can't by pass it and we don't know what is causing it. Is there any way we can get someone out here to take a look at it? 5-15-17 Replaced batteries in all wireless zones. System still bypass system 8. Found one sensor with no cover- and has cracked plastic. Possible sensor not working.	Service Visit

BWW-Howell, MI	5/4/2017	1808	Complete- Chris 6/20/2017	This is Buffalo Wild Wings in Howell, MI. I spoke with Jason earlier on the phone regarding our AV tower. The slot for satellite 5 in the tower is not sending data from the HDMI to the TV's. Jason had me run the HDMI cable from box 6 into slot 5 in the tower and we did not have a picture. We ran the HDMI from box 5 into slot 6 in the tower and we did have a picture. Jason explained this is an internal issue that needs to have a technician onsite to investigate. Please let us know when we can schedule service.	Service visit
